

## **XTDL-HT™** **Optical Moisture Analyzer**

### **Typical Applications**

- Annealing
- Brazing
- Carburizing
- Carbonitriding
- Hardening
- Sintering
- Carbon Restoration

The XTDL-HT™ is designed with a new proprietary optical sampling system for the dirty blanket gases in your Heat Treating applications that causes other analyzers to be damaged, readings to drift and a measurement that cannot be trusted as reported by our many customers after 30 years in this business.

Without accurate, repeatable and reliable moisture dew point measurement of these gases, your ability to control the finish of the parts will be inconsistent and loose revenue due to reworking the undesired finishes.
